## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, drawn to a mounting apparatus.

Group II, claim(s) 3-4, drawn to a mounting method.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. Group I does not contain a special technical feature. Every limitation in independent claim 1 is known in the art. For example, U.S. Patent Application Publication No. 2004/0009650 to Jeong et al. including, a supporting means (122/138) for supporting a strip material attaching a film for forming dicing tapes stuck on one surface of a base sheet; a pre-cut means (135) for forming a dicing tape by forming a cut in said film in accordance with the size of said ring frame; and a sticking means (130/130') for fixing the semiconductor wafer to the ring frame by peeling off said dicing tape from the base sheet and sticking the dicing tape onto the ring frame (See Figure 8). Consequently Group I does not contain a special technical feature.

4. The special technical feature of Group II is forming a cut in said film. The other features of independent claim 3 may be found in the prior art. See U.S. Patent No. 6,238,515 to Tsujimoto, which discloses using a precut film in accordance with the size of said ring frame in a process of feeding out a strip material attaching a film for forming dicing tapes stuck on one surface of a base sheet; peeling off the dicing tape formed inside said cut from the base sheet; and moving the dicing tape and said table relative to each other to stick said dicing tape onto the semiconductor wafer and the ring frame, thereby fixing the semiconductor wafer to the ring frame (see Figure 12).

5. Consequently, Groups I and II do not contain a common special technical

feature, and therefore lack unity.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
